

Adding a Facebook like button to your site

To add a facebook like button to your site you will need to get the code from facebook first, then add this code to your page.

[1] Go to the following facebook page: <http://developers.facebook.com/docs/reference/plugins/like/>

[2] Facebook will give you some options to customise your like button.

You should see a preview of your button on the right.

Please ensure the "Send Button" is un-ticked.

[3] Once you have customised your button, choose "Get Code"

[4] A pop-up should appear containing some code.

Choose the "IFRAME" option.

[5] Copy the code by selecting it with your mouse, right clicking the selection and choosing "copy" or Ctrl+C.

[6] For users on the Shift content management system, paste this code into an HTML block. See the following link for a tutorial:

<http://www.123online.co.nz/support/video-tutorials/apps-marketplace/free/html/>

For users on our older version content management system, embed this code in your content area by using the "Source" option. A video tutorial for embedding code is available at the following link:
